- ✓ **Prepare to Receive the Force**
- ✓ **Conduct POD Operations**
- ✓ **Prepare the Force**
- ✓ **Assemble & Marshal Forces**
- ✓ **Onward Movement**
- ✓ **Conduct TAA/OA**

Airport

OBJECTIVE AREA

STAGING AREA

Seaport

The offloading and marshaling of unit personnel, equipment, and materiel at ports of debarkation (POD) and then transporting these elements from the PODs to a staging area. Reception includes all those functions to clear unit personnel and equipment through the PODs.   JP 4-01.8

Reception

Airport

Seaport

STAGING AREA

OBJECTIVE AREA
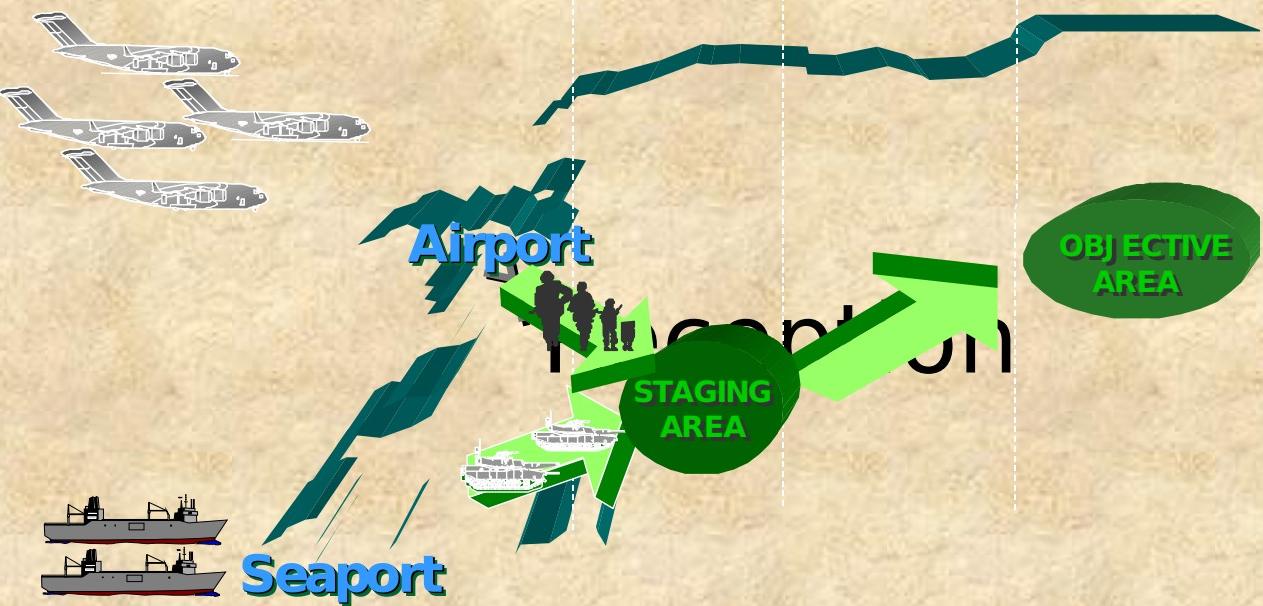

staging
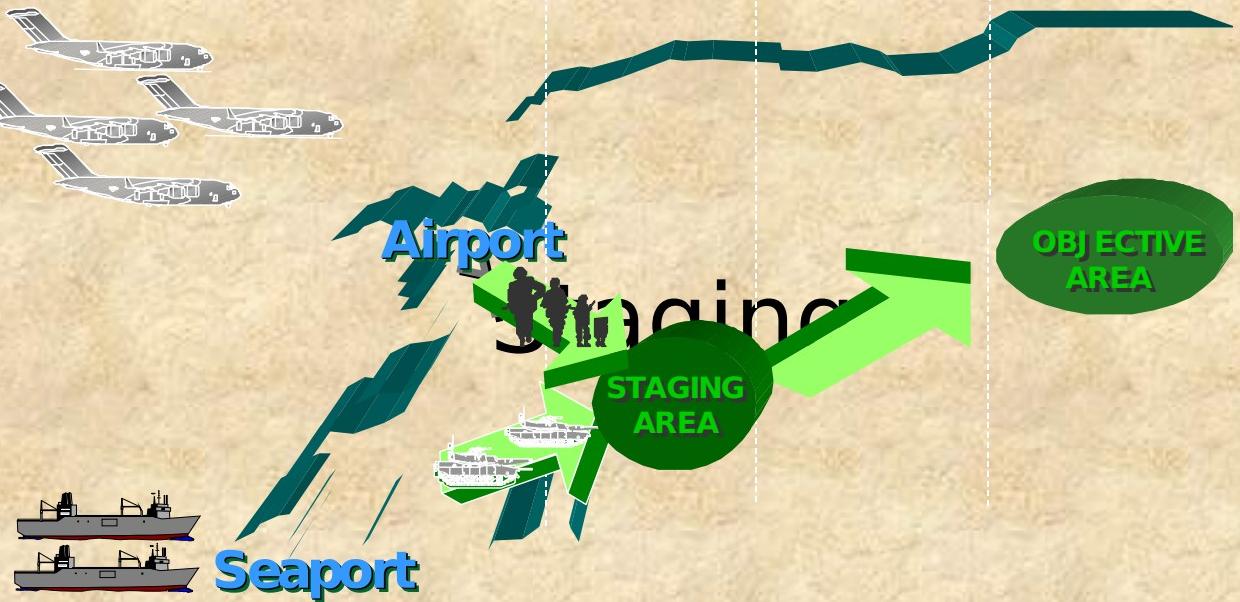

The assembling, temporarily holding, and organizing arriving personnel and materiel into units and forces; and preparing them for onward movement and tactical operations. JP4-01.8

Airport

Staging

Seaport

STAGING AREA

OBJECTIVE AREA

Onward Movement

The process of moving units and accompanying materiel from reception facilities to marshaling areas; from marshaling areas to staging areas; and from staging areas to tactical assembly areas or other theater destinations. JP 4-01.8

Airport

OBJECTIVE AREA

Onward Movement

STAGING AREA

Seaport
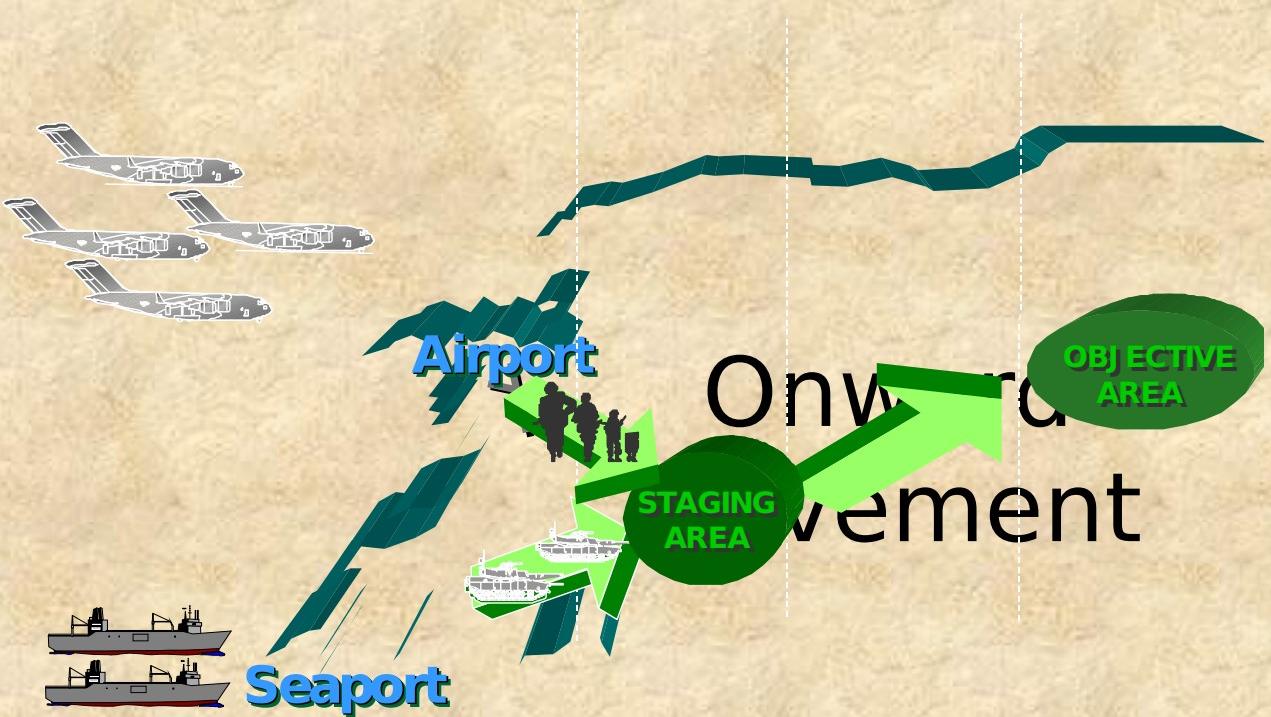

Integration

The process of establishing force projection units into coherent operational units in the designated joint operational area. JP 4-01.8

Airport

Integration

Seaport

STAGING AREA

JRSOI Sequence

- ✓ **Receive personnel, materiel, and equipment at theater PODs**
- ✓ **Assemble deploying forces and equipment into units at designated staging areas**
- ✓ **Move units forward to designated locations as specified by combatant commander**
- ✓ **Integrate units into a mission capable joint force**

Key JRSOI Players

- ✓ **Supported/Supporting Combatant Commanders**
- ✓ **Joint Task Force**
- ✓ **Service Components**
- ✓ **Deploying Unit(s)**
- ✓ **Support Organizations (enabling units)**
- ✓ **Allies**
- ✓ **Host Nation**

Joint Reception, Staging, Onward Movement, and Integration (JRSOI) Process Map

✓ Analyze Mission
✓ Confirm Deployment Data

Reception	Staging	Onward Movement	Integration
✓ Prepare to Receive the Force ✓ Conduct POD Ops	✓ Prepare the Force ✓ Assemble and Marshal Forces	✓ Onward Movement	✓ Conduct TAA/ Objective Area Operations ✓ Complete Force Integration
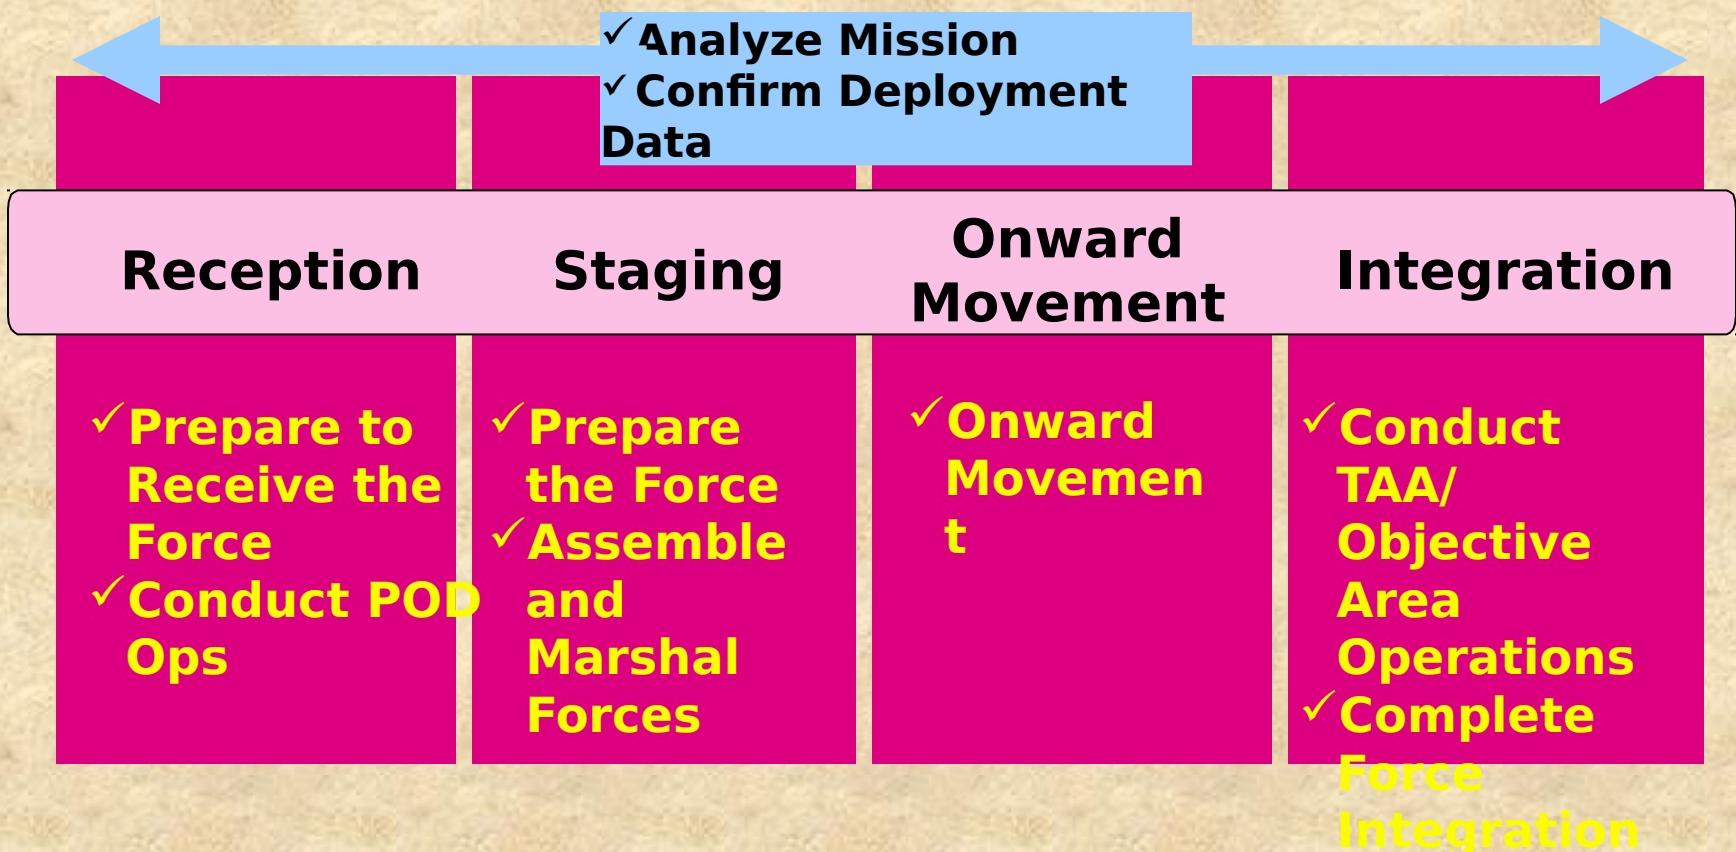

JRSOI Planning Considerations

- ✓ **Scope of Operation (type, duration, size and composition of the force, etc.)**
- ✓ **Operational Environment (AOR)**
  - · **Locations and capabilities of PODs**
  - · **Host nation support**
  - · **Environment (desert, cold weather, etc)**
  - · **Threat**
- ✓ **Time expected between arrival and commencement of operations**

- ✓ **JRSOI planning considerations affect deployment loading options (combat, unit, or administrative)**

Analyze Mission

Tasks

✓ **Conduct Initial Mission Analysis**
- **Identify JRSOI Support Requirements**
- **Identify Host Nation, Contract, and Command Capabilities**

Confirm Deployment Data

Tasks

- ✓ **Validate TPFDD Movement Requirements**

- ✓ **Recommend TPFDD Changes**

Prepare to Receive the Force

Tasks

- ✓ **Establish Theater Distribution Systems**

- ✓ **Coordinate HN & Contract Support**
- ✓ **Establish Support Organizations**
- ✓ **Prepare Assembly/Staging Areas**

Host Nation JRSOI Considerations

- ✓ **Basing rights**
- ✓ **Transit authority (land, sea, air)**
- ✓ **Border/diplomatic clearances**
- ✓ **POD services**
- ✓ **Life/logistics support**
- ✓ **Medical facilities and services**
- ✓ **Construction and engineering**

Conduct POD Operations

Tasks

- ✓ **Receive Personnel and Cargo**
- ✓ **Process Personnel and Cargo for Movement & Prepare Documentation**
- ✓ **Move to Staging Area**
  - **Conduct Movement Control Operations**

Primary Reception Activities

- ✓ **Strategic lift arrives at PODs**
- ✓ **Receive personnel, equipment, and cargo at PODs**
- ✓ **Process arriving forces and materiel in MA**
  - · **Sort unit equipment and personnel**
  - · **Reestablish property accountability**
  - · **Organize for onward movement**
- ✓ **Commence movement to staging area**

Prepare the Force

Tasks

- ✓ **Establish C2, Security, Unit Area**
  - • **Report Status**
- ✓ **Coordinate Support Requirements**
- ✓ **Assemble & Process Personnel**
- ✓ **Receive Equip, WRM & Supplies**
- ✓ **Conduct Training & Perform Equip Checks**

Assemble & Marshal Forces

Tasks

- ✓ **Process Personnel & Cargo**
  - **Sequence Loads**
- ✓ **Coordinate Movement Security Requirements.**

Force Protection

- ✓ **High value targets**
- ✓ **In-transit forces vulnerable**
- ✓ **Wide range of threats**
- ✓ **Combatant commander/ HN responsibility**
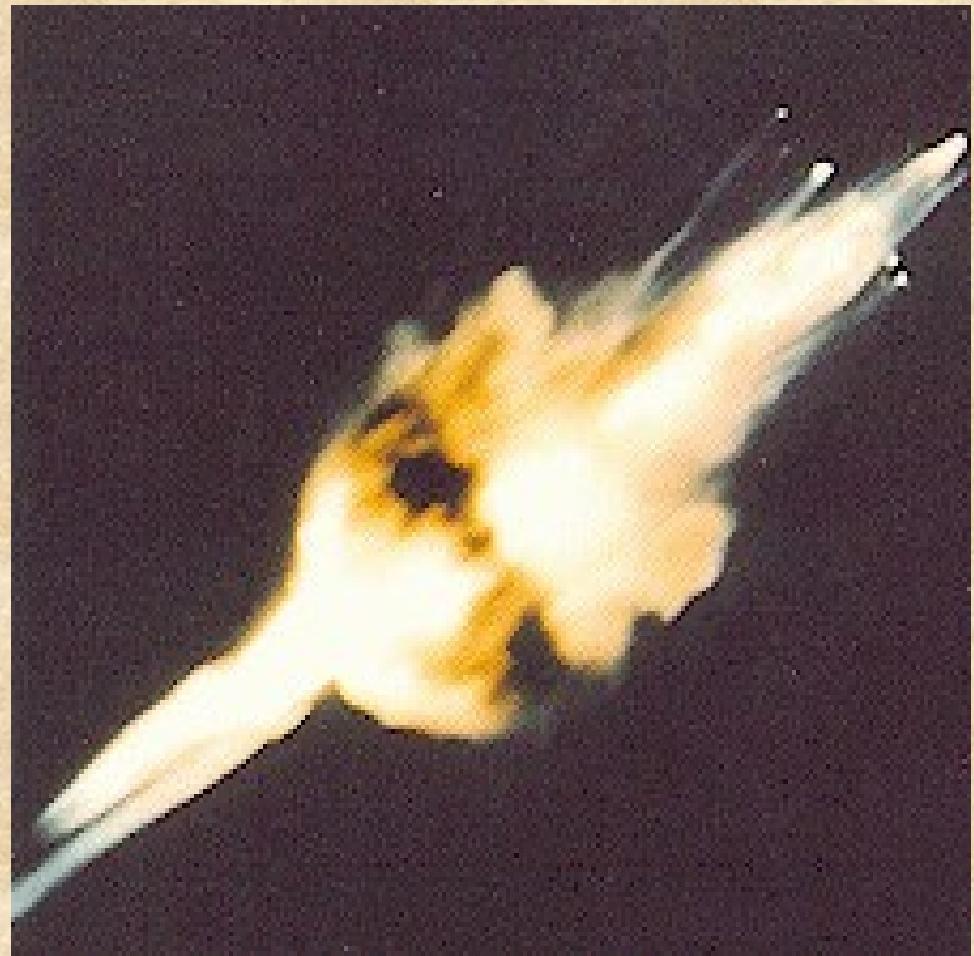

Onward Movement

Tasks

✓ **Movement to TAA/OA**

- **Conduct Movement Control Operations**

  –

Critical Functions of Onward Movement

- ✓ **Command and control**
- ✓ **Communications**
- ✓ **Transportation**
- ✓ **Supply and services**
- ✓ **Host nation support**
- ✓ **Force protection**

Conduct TAA/OA Operations

Tasks

- ✓ **Establish C2, Security, Unit Area**
  - • **Report Status**
- ✓ **Coordinate Support Requirements**
- ✓ **Conduct Force Assembly and Accountability**

Complete Force Integration

Tasks

✓ **Integrate C4I with Gaining Command**

✓ **Integrate Combat Service Support**

✓ **Conduct FTX & Rehearsals**

✓ **Confirm Mission Readiness**

Deployment in Joint Operations

Joint Pub 3-0

Phases of Joint Operations

Prehostilities

During predeployment activities, JFCs tailor forces for deployment. The C4I and logistics requirement of the force must be developed during the predeployment phase in order to support JFC concepts of operations. When in-place forces are not sufficient and/or are not appropriate for the envisioned operations, early determination of the forces required and the order in which they are needed based on JFC's concept of operations , assists in

Lodgment

Allows the movement and buildup of a decisive combat force in the operational area. In operations during peacetime, deployment will normally include movement to host-nation air or sea ports   In operations conducted before and during combat, initial deployment may require forcible entry, followed by the occupation and expansion of lodgment areas.

Decisive combat and stabilization

The appropriately sequencing of forces into the operational areas can contribute greatly to the stabilization of the situation. Further, deployment of forces may serve as a deterrent to hostilities, but if deterrence fails, deployment will permit JFCs to build up full dimensional capabilities rapidly to conduct decisive action as early as possible.

Follow-through

Follow-through includes those actions that ensure the political objectives are achieved and sustained. Part of this phase may be to ensure the threat is not able to resurrect itself. Such a phase focuses on ensuring that the results achieved endure. During this phase, joint forces may conduct operations in support of other governmental agencies. JFCs

Posthostilities and redeployment

JFCs may retain responsibility for operations or they may transfer control of the situation to another authority and redeploy their forces. JFCs should identify posthostilities requirements as early as possible to best accomplish these missions and simultaneously redeploy assets no longer needed to resolve the crisis.

Joint Deployment Training Center

The Joint Deployment Training Center (JDTC) develops and implements standardized joint deployment process and Joint Operation Planning and Execution System (JOPES) education and training.

Based at Fort Eustis, Va., USJFCOM's JDTC trains more than 3,000 students annually through: in-resident training, mobile training teams, and distance learning - principally computer and Web-based training.

JDTC uses four secure classrooms to educate and train members of the Joint Planning and Execution Community (JPEC) and other government organizations. JDTC also provides mobile training teams, develops traditional Joint Deployment Process curriculum and distributed learning products.

The pre-deployment training enables military personnel to more effectively plan and execute joint operations and it educates unified commands, services, and other government agencies to successfully use the Defense Transportation System during contingencies.

JDTC traces its lineage to a variety of both service and joint agencies focused on training personnel on various deployment planning and execution-related systems. Beginning as the Airlift Concepts and Requirements Agency at Scott Air Force Base, Ill., in 1984, and working with organizations like the U.S. Transportation Command, Air Mobility Command, the U.S. Army Training and Doctrine Command and the U.S. Army Transportation Center, the command has developed to become the premier trainer for the JPEC.

Before joining U.S. Joint Forces Command in 2004, JDTC worked as part of U.S. Transportation Command

What USJFCOM Does
